SUSE Linux Enterprise Server supports varied requirements

SUSE Software-defined Infrastructure and Application Delivery Approach

Topics

SUSE Linux as a Transformation vehicle

- SUSE – where are we today ?
- **SUSE Linux Enterprise 15**
- SLE on the Mainframe
- Enterprise modernisation

Operating System Requirements

Traditional Infrastructure

Multiple use cases

Manual and automatic installation

Variety of updates, upgrades, legacy

Variable packaging and installation

Might become huge in size and management

Software-defined Infrastructure

Single use case, multiple systems

Automatic and centralized installation

Always up-to-date

Fit one purpose

Small as possible for size and management

SUSE Linux Enterprise 15 – Themes

Multimodal – address traditional & containerized infrastructure

Provide a common code base for traditional and software defined data center.

Unified Installer

Install all SUSE Linux Enterprise 15 products starting from a single medium.

Modular+

Everything is a module: A stable base, progressive options, flexible delivery.

Ease of use – hassle-free use of modules & extensions

Easily search, install, and use packages across the SUSE universe.

Evolution of the Operating System

Past
Monolithic

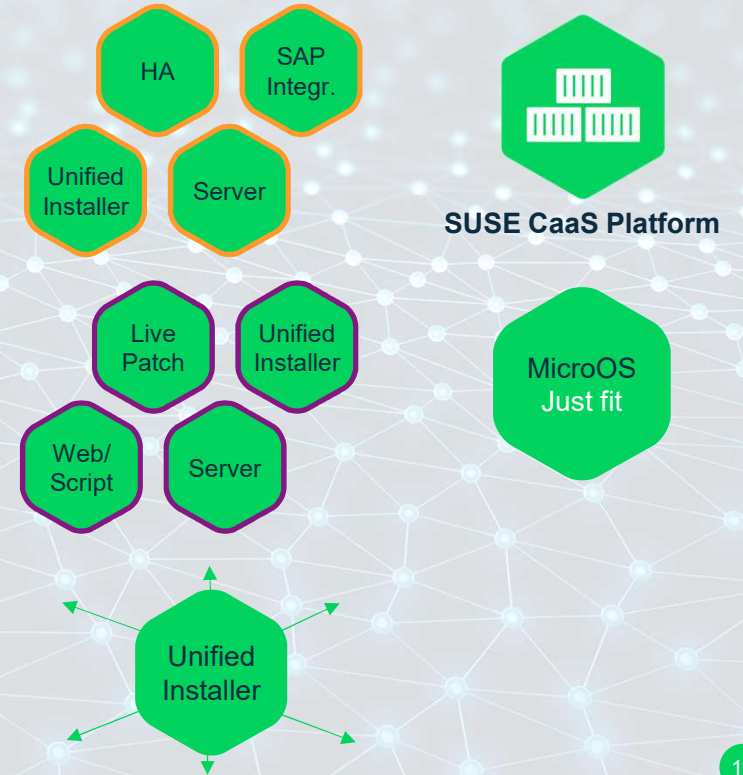

Present
Modular

- Public Cloud
- Web/Script
- Toolchain
- Containers

Future
Modular + Single Case

SUSE Linux Enterprise—Base OS / Modules

12 SP3	15	12 SP4	15 SP1	12 SP5
<p>Base OS</p> <ul style="list-style-type: none"> SUSE & partner selected HW enablement, including driver updates Improved performance Common code base with SUSE Container as a Service Platform Foundation for SDN/NFV <p>Modules</p> <ul style="list-style-type: none"> Toolchain update Salt software stack in the Advanced Systems Management module HPC module for x86-64 and arm 	<p>Multi mode OS delivery SUSE Linux Enterprise Server and Desktop, SUSE Linux Enterprise Server for SAP Applications + Modules + Extensions</p> <ul style="list-style-type: none"> General purpose OS versions Multiple use cases (physical, virtual, containers) Full set of deployment, management options; Full control of the installed packages, updates, upgrades Continue major version upgrade support including auto-upgrade <p>Common Code Base Architecture/platform support</p> <ul style="list-style-type: none"> Arch64, x86-64, ppc64le, s390x Designed for physical, virtual, clouds & containers - Ready for IoT <p>Security</p> <ul style="list-style-type: none"> Cryptography (TLS 1.3), trusted computing, prepared for certifications 	<p>Base OS</p> <ul style="list-style-type: none"> HW enablement via Kernel version update, following upstream Update of the graphics stack, not including Gnome <p>Modules</p> <ul style="list-style-type: none"> Toolchain update Refresh of module packages according to separate lifecycle of modules 	<p>Base OS</p> <ul style="list-style-type: none"> SUSE & partner selected HW enablement, including driver updates. NVDIMM! Improve “system roles” Finalize common criteria certifications and FIPS 140-2 validation Migration from SUSE Linux Enterprise 11 SP4 to SUSE Linux Enterprise 15 SP1 Improve SAML2 single sign-on framework <p>Modules</p> <ul style="list-style-type: none"> Enhancements to Developers Module according to customer and partner demand <p>Ease of use</p> <ul style="list-style-type: none"> Quarterly updates of installation media 	<p>Base OS</p> <ul style="list-style-type: none"> Last service pack for SUSE Linux Enterprise 12 (tentative) Consolidation release Constant user land (minor version upgrades by need or business case) Reuse kernel from SP4 + very selected hardware innovations (including graphic stack) <p>Modules</p> <ul style="list-style-type: none"> Latest GCC version in the Toolchain module

Hardware Architectures: Intel 64 / AMD64 – IBM z and LinuxONE – IBM Power – arm
SUSE Linux Enterprise Server for SAP Applications inherits features from BaseOS and modules. Available on Intel/Arm and IBM Power

SUSE Linux Enterprise Server 15 Beta4 License Agreement

License Language

English (US)

SUSE(R) End User License Agreement for Beta Software

PLEASE READ THIS BETA AGREEMENT CAREFULLY. BY INSTALLING, DOWNLOADING OR OTHERWISE USING THE SOFTWARE, YOU AGREE TO THE TERMS OF THIS BETA AGREEMENT AND ANY SUPPLEMENTAL SUSE LICENSE AGREEMENT INCLUDED WITH THE SOFTWARE. IF YOU DO NOT AGREE WITH THESE TERMS, DO NOT DOWNLOAD, INSTALL OR USE THE SOFTWARE. THE SOFTWARE MAY NOT BE SOLD, TRANSFERRED, OR FURTHER DISTRIBUTED WITHOUT PRIOR WRITTEN AUTHORIZATION FROM SUSE.

This SUSE End User License Agreement for Beta Software ("Beta Agreement") together with any Supplemental SUSE License Agreement included with the Software constitutes a legal agreement between You (an entity or a person) and SUSE LLC ("SUSE"). The software product(s) accompanying this Beta Agreement, software updates, media (if any) and accompanying online or printed documentation (collectively the "Software") is protected by the copyright laws and treaties of the United States and other countries and is subject to the terms of this Beta Agreement. If You do not agree with the terms of this Beta Agreement, do not download, install or otherwise use the Software and, if applicable, return the entire unused package to SUSE. The Software is licensed to You, not sold.

The Software may include or be bundled with other software programs licensed under different terms and/or licensed by a licensor other than SUSE. The terms of an end user license agreement accompanying a particular software file upon installation or download of the software shall supersede the terms presented below. Third party software programs are provided for use at Your option. SUSE is not

I Agree to the License Terms.

Additional Changes

- **GCC7 as system compiler**

Will stay the same during SLE 15 lifetime, Yearly updates will be provided in a channel

- **OpenSSL**

1.1.x as default, 1.0.x available in Legacy for a grace period

- **Scripting languages**

Ruby 2.5, PHP7, Perl 5.26, Python 3.6 (Python 2 will be in Legacy Module for a grace period)

- **Gnome 3.26**

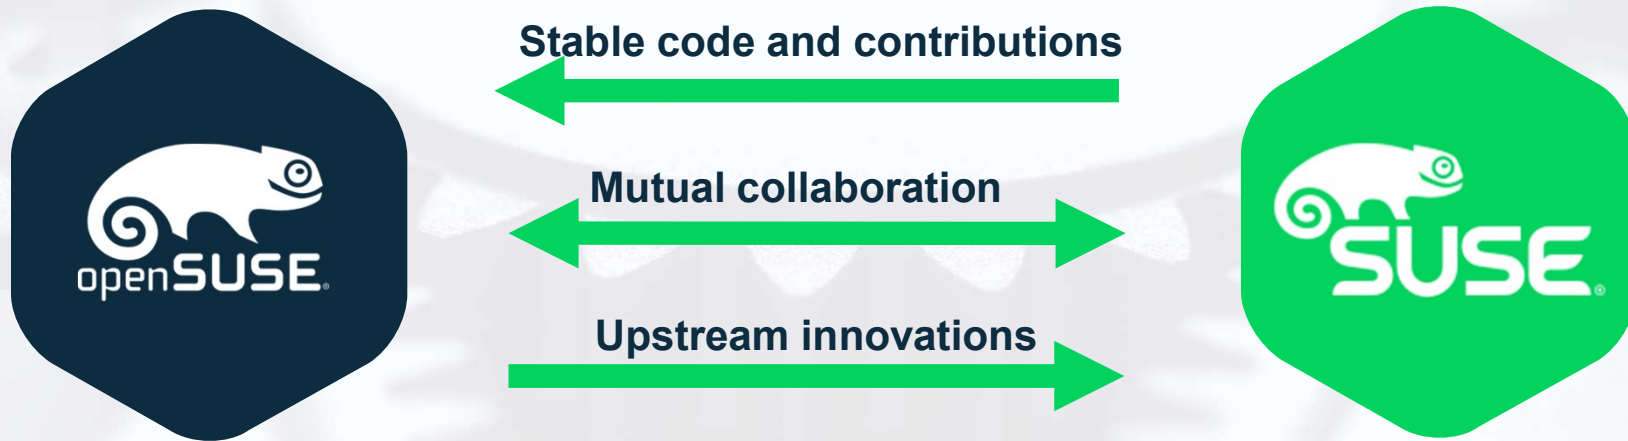

- **High Availability**

- Hawk2 UI improvements
- DRBD multi-node three-way replication
- Cluster-raid 10 (as Technical Preview)

Additional Changes

- **Chrony (ntpd will be in Legacy for a grace period)**
- **Firewalld (replaces SUSEFirewall2)**
- **SALT in Base system**
- **TLS 1.3**
- **Improved: Package search**
 - Across modules
- **FIPS 140-2 (post GA)**
- **Nvdimmm improvements**
- **OpenJDK 9**
- **and much more...**

SUSE & openSUSE – Working Together

The New openSUSE Distributions

Tumbleweed

openSUSE Tumbleweed

- Rolling Release
- Continuously Updated & Tested
- Perfect for Upstream Developers & Power Users

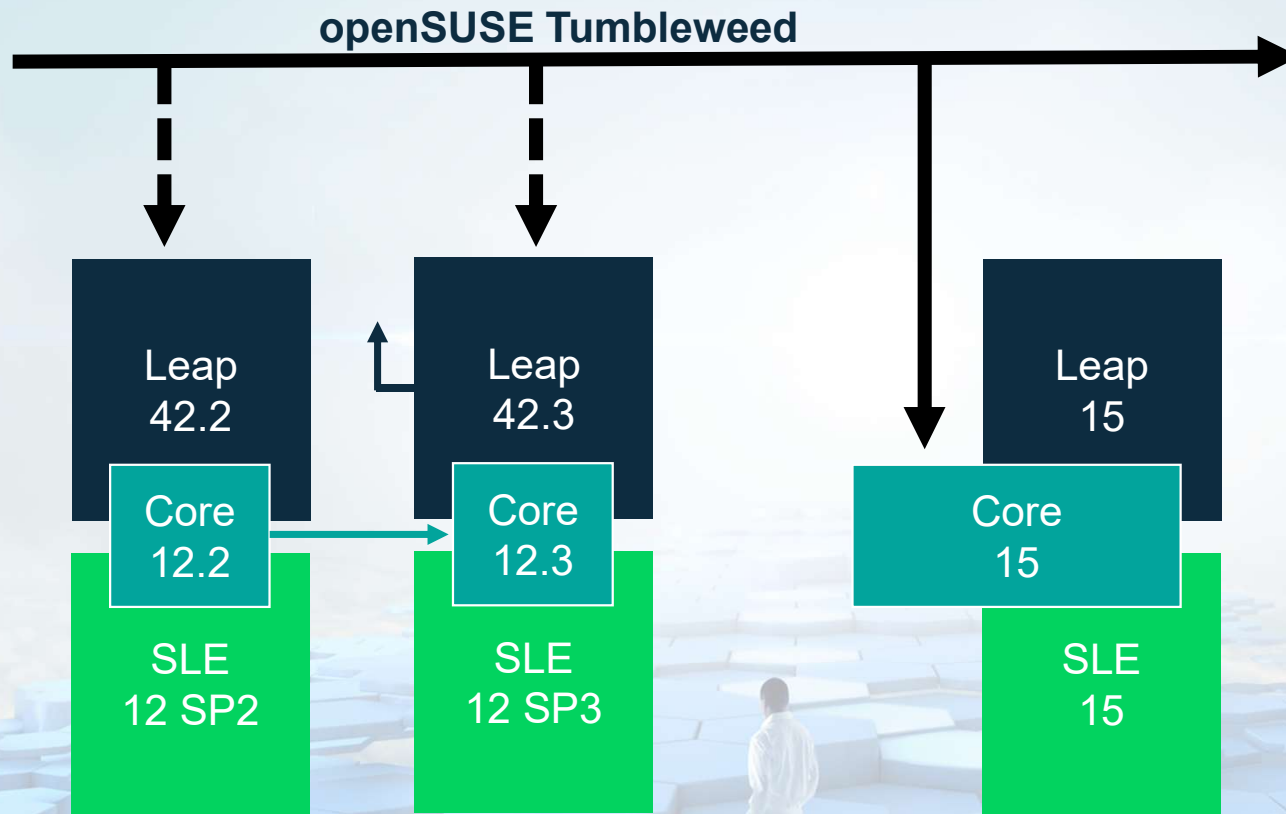

Leap

openSUSE Leap

- Regular release
- Shared core with SUSE Linux Enterprise
- Perfect for SysAdmins, Enterprise Developers and Users

Long Future Ahead

SUSE Linux on Mainframe Customers

Business Connexion (BCX)

South African Outsourcing company

65 customers, incl. top 10 blue chip in SA

Oracle Suite licensing driving architecture
(very expensive on x86)

Standardised on SLES for SystemZ
following PoC.

30 – 40 % license savings

ICU IT

Netherlands based IT services company

z/OS and Linux services for top 100
companies in the Netherlands

Looked at LinuxONE for internal training

Supports hundreds of KVM guests

Using OpenStack for application demos

Significant saving in
footprint/power/cooling over x86 servers
