

On-demand Mainframe Testing Capacity in a DevOps World

Brian Crane Micro Focus

November 2019

Session MG

Agenda

- Mainframes and innovation
- What is changing?
- Modernisation approaches
- Improving Testing in a DevOps world

For the enterprise, innovation requires the mainframe

- - - - ::::00

.....

FOCUS

Mainframe Innovation

Digital Transformation is Driving Business Change

According to Forrester and Accenture:

Mainframe Innovation The Move to Modernize

58%

want to fully leverage their mainframe

(11th annual BMC Mainframe Market survey)

67% are increasing mainframe capacity this year.

(11th annual BMC Mainframe Market survey)

are using Linux on z Systems.

(IBM Systems Magazine in November 2016)

Faster mainframe application delivery is a 'Survive and Thrive' imperative.

(Forrester)

45%

are implementing **DevOps practices or** planning to do so. (Gartner)

ability to knowate their core business processes

Why Modernize the Mainframe? 2017 Mainframe Research

85% of mainframe applications are strategic

10+ year lifespan for mainframe applications

2B lines of code currently in production

2017 Mainframe Research Mainframe Applications Are Moving Forward

46% Of mainframe applications will be maintained

38% Of mainframe

applications will be modernized strategy F drives σ Ð Ð Č S Busines

The Mainframe Modernization

The hybrid challenges and drivers for change

Application Modernization Drivers

- New markets and services
- IoT/Proliferation of devices
- Competitive Pressure

Process Modernization Drivers (DevOps)

- Time to market
- Quality
- Access to skills

Infrastructure Modernization Drivers

- Lower cost and changing cost models
 - Opex vs Capex
- On prem vs Cloud
- Flexible deployment models

Mainframe DevOps

Unite dev and test teams using integrated toolsets

Understand

Make better development decisions with application insight provided at the point of change

Develop

Remove infrastructure limitations and unnecessary mainframe reliance by developing on and off the mainframe

Accelerate

Maximize developer efficiency and improve delivery times by up to 40%

Extend

Modernize and integrate mainframe applications with web services and the open Eclipse framework

Test

Low cost, scalable mainframe application testing

Flex and Scale

Remove capacity bottlenecks and improve delivery time with flexible, scalable resources

Higher application quality and throughput without additional cost

Cost Efficiency

Manage test capacity and resource using lower cost environments

Test Flex and Scale – Remove bottlenecks. Improve time to delivery

- Remove capacity and resource constraints with a scalable low cost test execution environment
- Scale up test capacity on demand.
- Flexible access to mainframe applications, job steps and data where needed
- Easier continuous integration (CI) for the mainframe

Test Quality – Shift Left: Test early and often

- Resolve quality issues, faster through greater agility and continuous integration
- Shift testing left
- Enable end-to-end testing for composite applications
- Faster resolution of complex runtime issues through use of advanced diagnostic tools

Test Cost Efficiency – More test capacity at a lower cost

- Manage test resource consumption to free up MSUs for production workload
- Virtualize test environments for costeffective capacity
- Simple configuration to remove reliance on systems administrators
- Reduce delivery cost by finding and resolving issues earlier

Mainframe Subsystems Support

- JCL support for testing of batch applications, support for common mainframe utility programs
- VSAM and QSAM support test on EBCDIC data files on Windows
- DB2 support using a DB2 compatible database (or connect to IBM DB2)
- **CICS** support including integrated EXEC CICS pre-compiler
- IMS transaction manager (IMS/TM) and database manager (IMS/DB) support

Micro Focus has over 25 years leadership in providing IBM mainframe compatibility and development process improvements

Application Language Support

- **COBOL** and **PL/I** compilers compatible with all major IBM language versions
- Assembler programs or sub-routines can be built and linked for use in pre-production testing

Mainframe Connectivity

- Remote invocation of mainframe processes
- Access to mainframe source and data with automatic synchronisation

Windows based configuration

- Web browser-based control and management of IMS, CICS and batch test regions for simple configuration
- **Scalable** multi-user, multi-region architecture provides robust test harness

Testing Tools

- **Test Coverage Reporting** ensure that all code paths have been executed during testing.
- Test automation of GUI or 3270 based applications – use Micro Focus UFT or SilkTest to automate testing and reuse test artefacts

Micro Focus – Mainframe Application Execution Architecture

Micro Focus Enterprise Test Server

One concept – multiple value

"The approach proposed by Micro Focus was 20 percent cheaper than the alternative option of expanding our mainframe capacity. Over three years, we expect to cut development and testing costs by 40 percent through heightened productivity and by exploiting efficiencies."

Milo Gusmeroli Vice President, Banca Popolare di Sondrio

"Using the Micro Focus solutions has increased our confidence in the quality of our production releases and we are able to include more enhanced functionality in each release we issue. *MATS BERGMAN System Developer SPV*

Reduced annual costs from \$3 million to \$120,000 per environment with test environments being provisioned in hours rather than weeks. Improved testing time by 50% which resulted in increased business agility by tripling the number of major releases per y*ear MAJOR Global Insurer*

Global insurance company

Overcomes core insurance application delivery management bottlenecks

Challenge

- Pressure to deliver more functionality to core insurance application
- Bottlenecks identified in the way source code was managed through Endevor resulting in inefficiencies in
 - The way parallel development changes are merged
 - Support for large enhancements with long running testing streams
- Inefficient mainframe tools slowed the development lifecycle and made it hard to train new staff

Products

- Enterprise Developer for z
- Enterprise Sync

Results

- Retrofitting of changes is now a much simpler, less error prone process which can be automated
- Easier access to change history means flexibility on how changes are merged back into different streams
- The unique Stream based views within Enterprise Sync/AccuRev has improved developer adoption
- Usage of modern Eclipse based development tools means code changes can be completed faster and it is easier for new joiners to get up to speed

Next Steps

Innovate Faster with Lower Risk

The journey to mainframe modernization

TIME / RISK

Mainframe Modernization The Next Step – Value Profile Meeting

- Complimentary
 - One day
 - Survey of stakeholders
- Application overview
- Technical review
- Strategy fit
- Assessment and recommendations provided within days

Please submit your session feedback!

- Do it online at http://conferences.gse.org.uk/2019/feedback/nn
- This session is MG

1. What is your conference registration number?

🛉 This is the three digit number on the bottom of your delegate badge

2. Was the length of this presention correct?

🍟 1 to 4 = "Too Short" 5 = "OK" 6-9 = "Too Long"

 $\overset{1}{\bigcirc} \quad \overset{2}{\bigcirc} \quad \overset{3}{\bigcirc} \quad \overset{4}{\bigcirc} \quad \overset{5}{\bigcirc} \quad \overset{6}{\bigcirc} \quad \overset{7}{\bigcirc} \quad \overset{8}{\bigcirc} \quad \overset{9}{\bigcirc}$

3. Did this presention meet your requirements?

🍟 1 to 4 = "No" 5 = "OK" 6-9 = "Yes"

 $\overset{1}{\bigcirc} \quad \overset{2}{\bigcirc} \quad \overset{3}{\bigcirc} \quad \overset{4}{\bigcirc} \quad \overset{5}{\bigcirc} \quad \overset{6}{\bigcirc} \quad \overset{7}{\bigcirc} \quad \overset{8}{\bigcirc} \quad \overset{9}{\bigcirc}$

4. Was the session content what you expected?

 $\overset{1}{\bigcirc} \quad \overset{2}{\bigcirc} \quad \overset{3}{\bigcirc} \quad \overset{4}{\bigcirc} \quad \overset{5}{\bigcirc} \quad \overset{6}{\bigcirc} \quad \overset{7}{\bigcirc} \quad \overset{8}{\bigcirc} \quad \overset{9}{\bigcirc}$
